# CONTEMPORARY EXQUISITE ONE OF A KIND

INNOVATION, ELEGANCE, SUPREME QUALITY.

Stucco Décor Moulding offers pre-coated unique shapes starting with an expanded polystyrene core precisely cut with state of the art CNC technology and reinforced with fiberglass reinforcing mesh, followed by 2 coats of an extrusion process of cementitious coating. This process ensures strength, durability and flexibility thus providing high quality architectural shapes at a very cost effective price in comparison to traditional materials like wood, stone, or concrete.

Our products can be applied to brick, stone, stucco or any other surface. Easy to install and light weight resulting in reduced labor costs associated with handling and installation costs.

Our mouldings are moisture resistant, will not rot and or crack resulting in long-term savings on maintenance and or replacement. Furthermore we back it with a 5 year material guarantee making our mouldings an ideal choice for your next project.

## **CUSTOM SHAPES?**

Over the years we manufactured many unique shapes for clients who want to stand out from the rest; these include;

- Create your own one of a kind moulding
- Modification of our catalogue shapes
- Matching existing mouldings (pre-cast, wood, PVC or EPS)

**Discover a world of unique possibilities!**
